The CA Foundation Course is the new entrance level for the Chartered Accountancy course in India. Earlier it was known as the Common Proficiency Test. CA Foundation exam is an entry-level exam for students interested to pursue a career in Chartered Accountancy. CA Foundation Exam is conducted by the Institute of Chartered Accountants of India (ICAI) twice a year. It is a national level exam which consists of four papers. To pursue CA in India, students must give the CPT or CA Foundation exam after Class 12. Passing this exam makes them eligible to get registered with the Institute of Chartered Accountants of India (ICAI) and pursue the next levels. This exam is the stepping stone to a bright career as a CA.

Business Mathematics & Statistics' is primarily intended for the third semester students of B.Com Honours and General courses at the University of Calcutta as per the CBCS syllabus of 2017-18. It is equally helpful for the students undertaking a course on Business Math and Statistics in other universities across Eastern India. The book is segemented into two modules- Module-I for Business Mathematics and Module-II for Statistics. It offers 'learning by practice' approach by providing 2000+ solved examples and questions.

The eBooks is authored by proficient Teachers and Professors. The Text of the eBooks is simple and lucid. The contents of the book have been organised carefully and to the point.

1. Simultaneous Equations, 2. Linear Programming (Two Variable), 3. Elementary Matrices, 4. Determinant, 5. Logarithms and Antilogarithms, 6. Simple Interest, 7. Compound Interest, 8. Annuities (Sinking Fund), 9. Ratio, 10 . Valuation of Simple Loan and Debenture, 11. Proportion, 12. Averages, 13. Percentage, 14. Commission and Brokerage, 15. Discount, 16. Profit and Loss, 17. Transportation Problem,

1. Averages, 2. Ratio, 3. Proportion, 4. Proportion, 5. Profit and Loss, 6. Simple Interest, 7. Compound Interest, 8. Annuity, 9. True Discount and Banker’s Discount, 10. Basic Concepts of Set Theory, 11. Simultaneous Equations, 12. Quadratic Equations, 13. Quadratic Equations.

Business Mathematics deals with the concepts and problem-solving techniques used in business mathematics. Learning objectives are included at the beginning of each chapter to give the student an overview of the skills they can expect to master after completing the chapter, along with worked-out examples and practice exercises; drill problems and word problems; and post-tests that let students measure their problem-solving skills. Topics covered in this book include operations with whole numbers, decimals, fractions, and percent; sales and inventory; finance; business and personal expenses; borrowing and investing; and data analysis. Starting with the fourth chapter, a case study is included at the end of each chapter for an in-depth analysis and discussion of a hypothetical business-related situation. Optional subsections in each chapter deal with mental arithmetic skills. Step-by-step problem-solving procedures are translated into written formulas, located in easy-to-find boxes for quick reference. A chapter glossary includes definitions for all key terms introduced in the chapter. The answer key at the end of the text includes all the answers for the pretests and post-tests, plus the answers to odd-numbered exercises. This monograph is intended for instructors of business mathematics and for their students who want to understand the concepts and master the problem-solving techniques of business mathematics.

An excellent book for commerce students appearing in competitive, professional and other examinations. 1. Matrix, 2. Inverse and Rank of Matrix, 3. Percentage, 4. Ratio and Proportion, 5. Average, 6. Mathematical Series : Arithmetic Progression, 7. Geometric Progression, 8. Harmonic Progression, 9. Simple Interest, 10. Compound Interest, 11. Set Theory, 12. Permutation and Combination, 13. Differentiation, 14. Integration, 15. Maxima and Minima, 16. Application of Differentiation and Integration in Business.
