Dictionary of Construction Terminology

Let me caution all residential owners that are involved with the construction industry, contractors, tend to be overly dramatic and inconsistent in their communication. There are contractors that will not get excited if the house is on fire, there are others, that will cause a major confrontation, if the grass is too long in the front yard. Contractors are neither consistent nor controlled, therefore there are several phrases, slang expressions, etc that could be bantered about, dependent ...

Construction Glossary & Dictionary of Terms for Building

Construction, frame- A type of construction in which the structural components are wood or depend upon a wood frame for support. Continuity tester- A device that tells whether a circuit is capable of carrying electricity. Contractor- A company licensed to perform certain types of construction activities. In most states, the general contractor's license and some specialty contractor's licenses don't require of compliance with bonding, workmen's compensation and similar regulations.
