A Novel Design Of Llc Resonant Converter For Wide Output

we have utilized a novel equipment to measure the resonant frequency and response curve of the LLC resonant transformer in frequency spectrum domain and calculate its equivalent circuit model and coefficient. According to the data mentioned above, we can smoothly design the switching mode PWM convert circuit.

UX Design and Usability Mentor Book includes best practices and real-life examples in a broad range of topics like: UX design techniques Usability testing techniques such as eye-tracking User interface design guidelines Mobile UX design principles Prototyping Lean product development with agile vs. waterfall Use cases User profiling Personas Interaction design Information architecture Content writing Card sorting Mind-mapping Wireframes Automation tools Customer experience evaluation The book includes real-life experiences to help readers apply these best practices in their own organizations. UX Design and Usability Mentor Book is an extension of best-selling Business Analyst's Mentor Book. Thanks to the integrated business analysis and UX design methodology it presents, the book can be used as a guideline to create user interfaces that are both functional and usable.

This two-volume set constitutes the refereed proceedings of the 16th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2022, held as part of the 24th International Conference, HCI International 2022, held as a virtual event, in June-July 2022. A total of 1271 papers and 275 posters included in the 39 HCII 2022 proceedings volumes. UAHCI 2022 includes a total of 73 papers; they focus on topics related to universal access methods, techniques and practices, studies on accessibility, design for all, usability, UX and technology acceptance, emotion and behavior recognition for universal access, accessible media, access to learning and education, as well universal access to virtual and intelligent assistive environments.

Los Angeles, 1937. Lillian Frost has traded dreams of stardom for security as a department store salesgirl. . . . until she discovers she's a suspect in the murder of her former roommate, Ruby Carroll. Party girl Ruby died wearing a gown she stole from the wardrobe department at Paramount Pictures, domain of Edith Head. Edith has yet to win the first of her eight Academy Awards; right now she's barely hanging on to her job, and a scandal is the last thing she needs. To clear Lillian's name and save Edith's career, the two women join forces. Unraveling the mystery pits them against a Hungarian princess on the lam, a hotshot director on the make, and a private investigator who's not on the level. All they have going for them are dogged determination, assists from the likes of Bob Hope and Barbara Stanwyck, and a killer sense of style. In show business, that just might be enough. The first in a series of riveting behind-the-scenes mysteries, Renee Patrick's Design for Dying is a delightful romp through Hollywood's Golden Age. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

HTML5 is the longest HTML specification ever written. It is also the most powerful, and in some ways, the most confusing. What do accessible, content-focused standards-based web designers and front-end developers need to know? And how can we harness the power of HTML5 in today's browsers?

A celebration of the meaning and comfort printed books bring to our homes and lives, from the curation and design experts at Juniper Books. Explore the significance of the home library, embellished with alluring photography and illustrations, in a keepsake worthy of any bibliophile's collection. For the Love of Books shares the vision of Juniper Books, a business that embraces the roles that books fulfill in our lives and their staying power. It recounts the history of books and private libraries, and champions the resilience of books in the digital era. Dive into the nuances that define books for reading, books for decoration, and books for inspiration. Instructive chapters provide useful details for creating and curating one's own home library, whether it be a single shelf or multiple rooms each with their own collection. You will never look at your bookshelves the same way again. For the Love of Books is about storytelling beyond the pages of our favorite books. Our books—the ones we choose to keep—tell the story of who we are. They remind us who we once were and who we aspire to be. Thatcher Wine founded Juniper Books in 2001. The company creates custom libraries and has perfected the art of turning books inside out to allow for books to tell stories not just to us, but about us. Working with booklovers, homeowners, and designers, Juniper Books has provided the world with a fresh new approach to the printed book. Thatcher grew up in New York City where his parents owned and operated The Quilted Giraffe, one of the most innovative restaurants in America. Thatcher graduated from Dartmouth College with a degree in history and art history and lives in Boulder, Colorado. Elizabeth Lane is the founder of Quarterlane, a quarterly subscription book service which merged with Juniper Books in 2018. She is also the book buyer for her local independent bookstore, Partners Village Store and Kitchen in Westport, Massachusetts. Prior to working in books, Elizabeth worked in contemporary visual art-in galleries, nonprofit initiatives and museums in New York, Austin, and Chicago. Elizabeth graduated from Davidson College with a degree in art history and received her masters degree from the School of the Art Institute of Chicago.

Content strategy is the web's hottest new thing. But where did it come from? Why does it matter? And what does the content renaissance mean for you? This brief guide explores content strategy's roots, and quickly and expertly demonstrates not only how it's done, but how you can do it well. A compelling read for both experienced content strategists and those making the transition from other fields.--Back cover.

#1 NEW YORK TIMES BEST SELLER • At last, a book that shows you how to build—design—a life you can thrive in, at any age or stage Designers create worlds and solve problems using design thinking. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise.

Anyone can master the fundamentals of game design - no technological expertise is necessary. The Art of Game Design: A Book of Lenses shows that the same basic principles of psychology that work for board games, card games and athletic games also are the keys to making top-quality videogames. Good game design happens when you view your game from many different perspectives, or lenses. While touring through the unusual territory that is game design, this book gives the reader one hundred of these lenses - one hundred sets of insightful questions to ask yourself that will help make your game better. These lenses are gathered from fields as diverse as psychology, architecture, music, visual design, film, software engineering, theme park design, mathematics, writing, puzzle design, and anthropology. Anyone who reads this book will be inspired to become a better game designer - and will understand how to do it.

Today, computer science engineering and telecommunications are two important areas linked and even inseparable. This is obvious for the user who connects the modem of his computer on his mobile phone or telephone line to access, via the global data network, the information available on the servers. The both domains are evolving rapidly and the development of new architectures of systems dedicated to telecommunications and computing becomes essential. Especially, wireless transmission systems with high data rate. Two parts of these systems should be developed software and hardware. Another area that is renewable energies becomes more attractive for researchers in order to develop new conversion systems with good performances, and a good optimization of energy. For example, in wireless sensor systems, we try to develop new protocols permitting to have a good autonomy in terms of energy.

The biggest challenge in any marketplace is uncertainty. The major changes taking place in world economies, politics, and demographics has raised market uncertainty to its highest level in the past 50 years. However, with new markets opening up in emerging and developing economies, the opportunities have never been better. To compete in this challenging atmosphere, product design/redesign and manufacturing must be integrated to produce better quality products faster and cheaper. Design Synthesis: Integrated Product and Manufacturing System Design provides a conceptual framework and methodologies to do just that. The book explains how to integrate innovative product design with the design of a batch manufacturing system. It covers the technical and social aspects of integration, presents research and best practices, and embeds integration within a framework of sustainable development. It covers the two methods for achieving design synthesis: integration and harmonisation. Product, manufacturing system, and social system architectures are integrated (united or combined to form a whole that is greater than the sum of the parts). The concurrent processes to design the architectures are harmonised (made compatible or coincident with one another). Wide in scope, the book supplies a multi-disciplinary perspective and an extensive discussion on how to maintain integrity during the design process. The authors present research and practices that are difficult or almost impossible to find. They describe the different types of system lifecycles and include guidelines on how to select the appropriate lifecycle for a specific design situation.
