innovative approach to the study of management and organization introduced in the first edition. To make the subject matter more relevant and accessible, it treats organizational behaviour as a field of activity that has many parallels with everyday life, particularly in relation to participating in organizations and institutions. Uniquely, this textbook presents two distinct and highly contrasting perspectives on organizational behaviour, discussing the alternative critical perspectives alongside the more traditional approaches, to encourage critical thinking and debate. Each chapter has been fully updated by specialist authors who are committed to thinking differently about the field of organizational behaviour. They effectively identify and explore the key concepts that underpin this diverse subject in their

Organizational behaviour affects all of us, every single day. But do your students struggle to see the subject's relevance? Do they have difficulty going beyond its most commonplace theories? Do they wonder how it will help them in their future career? Then take a step into the lobby of Junction Hotel! We follow the experiences of its managers and employees as a new consortium tries to rebuild the success of a once-great establishment that has fallen on hard times. This fictional running case study helps students see how theory translates into practice in a familiar setting. For example, what kind of leadership styles do the new management team use? Are personality tests any use for hiring new staff for the gym?

How do the staff on the receiving end of various management techniques feel and react? Follow the management dilemmas faced, and the techniques employed with varying rates of success, by a wide range of characters. The running case is interwoven throughout the book, encouraging students to make links between the different topic areas and gain a holistic view of organizational behaviour. The book covers all the core topics found on undergraduate modules, while also going a step further to consider alternative approaches and compare them with mainstream theories. Students are encouraged to develop a critical mindset and think about the context of the theories they come across and the values embedded within them. A wealth of real-life case studies, including those drawn from the public and not-for-profit

sectors, bring the subject to life. Innovative on-page learning features link study and employability skills to the topics being discussed so students can apply theories from the book directly to their own lives and future careers. Interviews with students, employees and business leaders are included online, and show just how relevant organizational behaviour is to people's everyday lives. The real-life examples in the second edition have been augmented with new international and European examples in every chapter, and the book's Online Resource Centre now features seminar and group activities and a lecturer guide to help lecturers make full and effective use of the book and online material in their teaching. A unique, lively package makes this core reading for all business students taking an introductory module in

"Alan Coppin is a rare individual. His experience and insight span private and public sectors, charities, and the Armed Forces. The vital importance of human capital is the thread which has bound all this together. His book is a rich gold mine of data, research, wisdom and anecdote." —Sir Gerry Grimstone, chairman of Standard Life, deputy chairman of Barclays, non-executive director of Deloitte and lead non-executive director at the Ministry of Defence In this new book Alan Coppin, a leader with extensive cross-sector experience, draws on discussions with leaders in the public and private sectors, as well as from charities, the military and trade unions to offer you the ideas and practical applications that

have proved effective in ensuring human capital is properly valued and managed. Most business decisions are based on lag data – historical reporting of what happened last month, last quarter or last year. It's solid, real and comforting. Unfortunately, it's also not a very good indicator of what might happen next. The best lead data – information with genuine predictive power – comes from understanding your people and what they can deliver. All major organizations claim that people are their greatest asset and yet, at the first sign of problems, the first action they take is to fire people. Why, because employees are also an organisation's biggest liability in terms of cost – and their cost is much easier to quantify than their value. But, like any asset, human capital will only deliver its full value if it is properly understood,

measured and managed. The author offers you the tools you need to take the issue beyond the HR department and satisfy the number crunchers in the boardroom. With their help, you can make human capital part of the normal financial metrics essential to running a successful organisation. Isn't it time you understood and managed the metrics that can predict your organization's future rather than relying on those that simply report on its past?
