Batik is an Indonesian technique of wax-resist dyeing applied to whole cloth. This technique originated from Java, Indonesia. Batik is made either by drawing dots and lines of the resist with a spouted tool called a tjanting, or by printing the resist with a copper stamp called a cap.

Batik - Wikipedia

Datik's iPanel product is designed to reduce the number of digital systems aboard vehicles by offering a variety of services via a single on-board control unit and one user interface. Could it benefit your fleet? The number of on-board systems fitted to coaches and buses is ever-increasing. Few operators are without wi-fi, telematics or one of several other digitally-based platforms that ...

Simplify on-board services with Datik's iPanel

Ellisons Travel is the first operator in the UK to install the Datik COVID Manager product. COVID Manager is an access control camera that is mounted at the entrance of a vehicle. It identifies passengers who are not wearing a face covering and those that show signs of having a high temperature.
