A full head to toe assessment is usually useful on at the beginning of each shift, on patient admission or when a patient's hemodynamic state is compromised. A focus assessment like the name suggests is an assessment that focuses on a single system. It gives the health care provider more details about what is going on with a patient in that particular body system. Any unusual findings should be followed up with a focused assessment specific to the affected body system.

A head-to-toe assessment checklist, or form, is a document that processes and reviews the patient's physical state and functions. Head-to-toe checklists are used by nurses, EMTs, doctors and physician assistants to perform and document a complete check of a patient's physical state. . These documents are also used in instances of primary care visits and annual physical checks, and less often with patients that present a specific health problem they may be experiencing.
