[jQuery Validation Plugin | Form validation with jQuery](#)

The document-ready processing in jQuery has been powered by the jQuery.Deferred implementation since jQuery 1.6. As part of jQuery 3.0's alignment with the Promises/A+ standard, document-ready handlers are called asynchronously even if the document is currently ready at the point where the handler is added.

jQuery

A single line of jQuery to select the form and apply the validation plugin, plus a few annotations on each element to specify the validation rules. Of course that isn't the only way to specify rules. You also don't have to rely on those default messages, but they come in handy when starting to setup validation for a form.
