A digital camera uses a built-in sensor that collects light to make a digital picture. The size of this sensor determines how much of a view the camera can capture. This size also affects the camera's depth of field, meaning images shot with a smaller sensor appear closer, as if zoomed in. Larger sensors result in more detail.

the right place. Most guides to Digital SLR photography will overwhelm you with jargon, but you and I both know that's not what photography is all about. When I first started out, I couldn't find any course or guide that actually helped me become a better photographer. Everything out there was either packed to overflowing with technical terms or far too expensive for my means. All I wanted was to know how to take the photographs I could see in my mind - and nobody was helping me do that. That's why I've written this guide - so you don't have to go through what I did. Give Me Just 48 HOURS and I'll Make You TEN Times a Better Photographer And I will do it for less than the cost of a cup of coffee. Signing up for an expensive course can cost you upwards of \$1000.
