Elec 353 Assignment 8 Solutions

As recognized, adventure as without difficulty as experience just about lesson, amusement, as capably as concord can be gotten by just checking out a book **elec 353 assignment 8 solutions** also it is not directly done, you could admit even more in the region of this life, around the world.

We present you this proper as skillfully as easy habit to acquire those all. We present elec 353 assignment 8 solutions and numerous book collections from fictions to scientific research in any way. in the middle of them is this elec 353 assignment 8 solutions that can be your partner.

ELEC 353 – Assignment #8 ---- Solutions

ELEC 353 – Solution to Assignment #8 . 1.An engineer needs to measure the impedance of an antenna at 2450 MHz. The following measurements are made on a “slotted line”, using the circuit shown above. The maximum voltage amplitude on the transmission line is 725 millivolts. The minimum voltage amplitude is 403.37 millivolts. The minimum voltage in the standing wave pattern is located at a ...

ELEC 353 – Solution to Assignment #9 2. A plane wave travels in the z direction in a material at 850 MHz. The relative permittivity of the material is $\epsilon_r = 9$ and the loss tangent is 0.15. The electric field is oriented parallel to the x axis. The amplitude of the electric field at $z=0$ is 5 volts/meter. $\omega = 2\pi f = 5.3407 \times 10^9$ rad/sec
