MATHEMATICAL APPLICATIONS FOR THE MANAGEMENT, LIFE, AND SOCIAL SCIENCES, 10th Edition, is intended for a two-semester applied calculus or combined finite mathematics and applied calculus course. The book's concept-based approach, multiple presentation methods, and interesting and relevant applications keep students who typically take the course--business, economics, life sciences, and social sciences majors--engaged in the material. This edition broadens the book's real-life context by adding a number of environmental science and economic applications. The use of modeling has been expanded, with modeling problems now clearly labeled in the examples. Also included in the Tenth Edition is a brief review of algebra to prepare students with different backgrounds for the material in later chapters. Important Notices: Media content referenced within the product description or the product text may not be available in the ebook version.

From recent developments in digital image processing to the next generation of satellite systems, this book provides a comprehensive introduction to the field of remote sensing and image interpretation. This book is discipline neutral, so readers in any field of study can gain a clear understanding of these systems and their virtually unlimited applications. * The authors underscore close interactions among the related areas of remote sensing, GIS, GPS, digital image processing, and environmental modeling. * Appendices include material on sources of remote sensing data and information, remote sensing periodicals, online glossaries, and online tutorials.

This book focuses on the five largest ethnic groups in the U.S. - Mexican Americans, African Americans, Native Americans, Japanese Americans, and Puerto Ricans. McLemore et al present historical information and contemporary examples of the largest ethnic and minority groups in the United States. Using the assimilation model, they analyze the strengths and weaknesses of this model in explaining how various racial and ethnic groups have been incorporated (or not) into U.S. society. Focusing on interracial and interethnic relations in the U.S., the authors give a sociological analysis of intergroup processes and the history of the interactions of these groups. Organized thematically rather than chronologically, the book illuminates the main racial and ethnic dilemmas faced in America as shown through the examples of these five groups. For anyone interested in Racial and Ethnic Relations, Minority Relations, Multicultural Education, or Ethnic Studies.

PLEASE PROVIDE COURSE INFORMATIONIdeal for use with any text on Physical Geography, this laboratory manual contains step-by-step exercises that help students apply essential geographic principles, methods, and tools to better understand Earth and its systems. Organization of each lab exercise chapter entails an introduction, key terms and concepts listing, objectives of the chapter, and a listing of materials and sources needed to complete the exercises. The initial laboratory exercise is called the Prologue Lab and is unique to this manual. The assignments in the Prologue are meant to span the entire term and will provide students with the tools of spatial analysis that are at the core of geography.
