Financial Reporting and Statement Analysis- 9780030238116

Financial statement reporting and analysis are two different things but of the same background. Financial reporting refers to the document that specifies and releases the financial statement and other information to its stakeholders and other public. This sort of document adds balance sheets, cash flow, net income, and other asset capital details. Whereas financial analysis is the evaluation and study of the different businesses and works to regulate its performance.
