"The real story of the Falklands War in the words of those who were there"-- Front cover.

From the end of 1941 to 1945 a pivotal but often overlooked conflict was being fought in the South-East Asian Theatre of World War 2 - the Burma Campaign. In 1941 the Allies fought in a disastrous retreat across Burma against the Japanese - an enemy more prepared, better organised and more powerful than anyone had imagined. Yet in 1944, following key battles at Kohima and Imphal, and daring operations behind enemy lines by the Chindits, the Commonwealth army were back, retaking lost ground one bloody battle at a time. Fighting in dense jungle and open paddy field, this brutal campaign was the longest fought by the British Commonwealth in the Second World War. But the troops taking part were a forgotten army, and the story of their remarkable feats and their courage remains largely untold to this day. The Fourteenth Army in Burma became one of the largest and most diverse armies of the Second World War. British, West African, Ghurkha and Indian regiments fought alongside one another and became comrades. In Forgotten Voices of Burma - a remarkable new oral history taken from Imperial War Museum's Sound Archive - soldiers from both sides tell their stories of this epic conflict.

'Between Friday and Monday we never slept at all. Everyone's face was one mass of sand ... The guns were so hot, all the paint had gone' Bombardier Ray Ellis Had the Allies lost in North Africa, Rommel's Afrika Korps would have swept through the Middle East, cutting the vital supply line through the Suez Canal to Australia and India, and taking the oilfields of the Persian Gulf. Britain would have been isolated, without oil, and unable to fight. These historic battles of 1940–1943 were fought over vast distances on rugged terrain, with supply lines often stretched to breaking point. It was here that David Stirling formed the SAS to perform audacious sabotage missions, and the Long Range Desert Group collected intelligence from behind enemy lines. This is the story of the Allies' first victory against Hitler's army, told in the voices of the men who were there, which proved that the seemingly unstoppable Germans could be beaten.

The subject of the new major film by Christopher Nolan It could have been the biggest military disaster suffered by the British in the Second World War, but against all odds the British Army was successfully evacuated, and 'Dunkirk spirit' became synonymous with the strength of the British people in adversity. On the same day that Winston Churchill became Prime Minister, Nazi troops invaded Holland, Luxembourg and Belgium. The eight-month period of calm that had existed since the declaration of war was over. But the defences constructed by the Allies in preparation failed to repel a German army with superior tactics. The British Expeditionary Force soon found themselves in an increasingly chaotic retreat. By the end of May 1940, over 400,000 Allied troops were trapped in and around the port of Dunkirk without shelter or supplies. Hitler's army was just ten miles away. On 26 May, the British Admiralty launched Operation Dynamo. This famous rescue mission sent every available vessel - from navy destroyers and troopships to pleasure cruisers and fishing boats - over the Channel to Dunkirk. Of the 850 'Little Ships' that sailed to Dunkirk, 235 were sunk by German aircraft or mines, but over this nine day period 338,000 British and French troops were safely evacuated. Drawing on the wealth of material from the Imperial War Museum Sound Archive, Forgotten Voices of Dunkirk presents in the words of both rescued and rescuers in an intimate and dramatic account of what Winston Churchill described as a 'miracle of deliverance'.

'It wasn't until after he was safely back in the aircraft again that I heard that he'd actually been out on the wing to try to put the fire out ... Remember that we were flying at about 90 miles an hour at a height of 13,000 feet' Squadron Leader RP Widdowson on Sergeant James Ward, who earned his VC in 1941 The Victoria Cross, awarded to the most courageous and determined servicemen, is the highest military decoration that can be bestowed. In Forgotten Voices: Victoria Cross, first-hand accounts of soldiers, sailors and airmen describe the incredible events that earned these extraordinary men the VC in the last century. Captivating and often humbling, these stories depict exceptional acts of bravery in unimaginable situations, of men who would say they were just doing their duty. Introduction by General Sir Richard Dannatt.

6 June 1944: the day Allied forces crossed the Channel and began fighting their way into Nazi-occupied Northwest Europe. Initiated by airborne units and covered by air and naval bombardment, the Normandy landings were the most ambitious combined airborne and amphibious assault ever attempted. Their success marked the beginning of the end for Nazi Germany. Drawing on thousands of hours of eyewitness testimony recorded by the Imperial War Museum, Forgotten Voices of D-Day tells the compelling story of this turning point in World War 2. Hearing from paratroopers and commandos, glider pilots and landing craft crewmen, airmen and naval personnel, we learn first-hand what it was like as men waited to go in, as they neared the beaches and drop zones, and as they landed and met the enemy. Accounts range from memories of the daring capture of 'Pegasus' bridge by British glider-borne troops to recollections of brutal fighting as the assault forces stormed the beaches. Featuring a mass of previously unpublished material, Forgotten Voices of D-Day is a powerful and important new record of a defining moment in modern history.

The 'Forgotten Voices' of the First World War speak for the final time. LAST POST is very consciously the last word from the handful of First World War survivors who were left alive in 2004. Now they have passed away, our final human connection with the First World War has been broken. Max Arthur, a skilled interviewer, took the very last chance we had to ask questions of those who were there. Now updated to include a new introduction by the author for the centenary of the First World War.

When Argentinian forces invaded the Falklands in April 1982, the British government responded by despatching a task force to the Atlantic to wrest back control of the islands. The resulting war saw modern weapon systems tested in combat for the first time, to tragic effect. In the aftermath, official documents were released, but many were heavily censored, and others withheld altogether, so that a full understanding of those events could not be gained. Drawing from recently declassified and previously unpublished reports from the official inquiry, Dr Paul Brown details the true story behind the dramatic events that led to the loss of six British ships – HMS Antelope, Ardent, Coventry and Sheffield, RFA Sir Galahad and SS Atlantic Conveyor – as well as the controversial sinking of the Argentinian cruiser ARA General Belgrano by HMS Conqueror.

For Britain and her empire, the human cost of the First World War was worse than any other conflict in history. Almost a million British people died in the war, with a further quarter of a million from Australia, Canada, New Zealand, India and Africa. Almost twice as many again were injured in battle, and forced to live the rest of their lives with missing limbs, damaged lungs and mental disorders. The legacy of the Great War was just as deeply felt as the war itself, and much longer lasting. An entire generation of children grew up without fathers. In some areas, women were doomed to a life of spinsterhood because there simply were not any young men left to marry. Every community supported dozens of damaged men, sometimes the butt of cruel childish jokes, but more often the object of silent pity. Most managed to forge a life for themselves again, despite their disabilities, traumas and disfigurements. Many rebuilt relationships with their families that had been all but destroyed by their experiences of war. WE WILL REMEMBER THEM is the story of these men and their families, told in their own words. It depicts the dying months of the Great War, when victory was close, but would still claim the lives of tens of thousands. It describes the joys and disappointments of triumph, the shock of homecoming, and the painful readjustment to ordinary civilian life. And it shows how wives and children reacted to their men coming home - often mentally and physically scarred, sometimes virtual strangers. The aftermath of the Great War lasted for decades, and in some cases is still felt today. This book, by the bestselling author of Last Post, is a fitting tribute to those who have experienced its legacy.

In 1988 Iraq was the region's dominant military power and ambitious to become leader of the Arab world. Saddam's war-experienced army were known to have used biological and chemical weapons in the past. This title provides a picture and explodes many myths of how this war was carried out, and why.
