Fundamentals of Nursing was developed during a time of major health care reform. Changes in response to social, political, and economic factors calling for reform in the delivery of health care, have greatly influenced the settings where nursing is practiced. This text addresses the changes by recognizing that students, now and in the future, will have less clinical experience in acute care settings and more exposure to alternate settings, such as skilled nursing units, home health, and outpatient clinics, for clinical learning experiences. A holistic concept of people, health, wellness, and healing is used to avoid the fragmentation that may occur in some health care settings. A holistic perspective focuses on all dimensions of an individual, including physiological, psychological, social, cultural, cognitive, and spiritual. An individual cannot be divided into separate entities and still be viewed as a unique being. In keeping with the holistic perspective, many concepts (such as sexuality, spirituality) have been integrated throughout the text. Special attention has been given to provide a clear, concise presentation of content that is realistic for the beginning nursing student. This text is timely in its approach to content, recognizing the inherent changes affecting the health care delivery system and the nursing curriculum. The authors recognize the student as an active participant who assumes a collaborative role in the learning process. Content is presented to challenge the student to develop critical thinking skills. (nursing, fundamentals, introductory, holistic, critical thinking, nursing process, FON)

Master the fundamentals of nursing while developing your critical-thinking and test-taking skills. More than 1,200 classroom-tested, NCLEX-style questions—including more than 440 alternate-item-format questions—reflect the latest advances in medical technology as well as the most recent guidelines and standards of care for nursing practice.

The fourth Australian edition of Kozier and Erb's Fundamentals of Nursing has undergone a rigorous review and writing process and reflects the contemporary changes in the regulation of nursing. It continues to focus on the three core philosophies of person-centred care, critical thinking and clinical reasoning and cultural safety. These three philosophical foundations are interwoven in a meaningful way through each chapter. With an evidence-based approach, students will develop skills in problem solving, critical thinking, clinical reasoning and learn to care for people in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern. MyLab Nursing can be packaged with this edition to engage students and allow them to apply their knowledge, strengthen their understanding of key concepts and develop critical decision making skills. Note: This edition provides relevant nursing diagnoses written in a way that is reflective of Australia nursing practice and nomenclature and does not refer to NANDA taxonomy of diagnostic terminology.
