-- physically, mentally, and emotionally -- from the most devastating circumstances, Perry shows how simple things like surroundings, affection, language, and touch can deeply impact the developing brain, for better or for worse. The groundbreaking exploration of the power of empathy by renowned child-psychiatrist Bruce D. Perry, co-author, with Oprah Winfrey, of *What Happened to You? Born for Love* reveals how and why the brain learns to bond with others—and is a stirring call to protect our children from new threats to their capacity to love. “Empathy, and the ties that bind people into relationships, are key elements of happiness. *Born for Love* is truly fascinating.” – Gretchen Rubin, author of *The Happiness Project* From birth, when babies' fingers instinctively cling to those of adults, their bodies and brains seek an intimate connection, a bond made possible by empathy—the ability to love and to share the feelings of others. In this provocative book, psychiatrist Bruce D. Perry and award-winning science journalist Maia Szalavitz interweave research and stories from Perry's practice with cutting-edge scientific studies and historical

examples to explain how empathy develops, why it is essential for our development into healthy adults, and how to raise kids with empathy while navigating threats from technological change and other forces in the modern world. Perry and Szalavitz show that compassion underlies the qualities that make society work—trust, altruism, collaboration, love, charity—and how difficulties related to empathy are key factors in social problems such as war, crime, racism, and mental illness. Even physical health, from infectious diseases to heart attacks, is deeply affected by our human connections to one another. As *Born for Love* reveals, recent changes in technology, child-rearing practices, education, and lifestyles are starting to rob children of necessary human contact and deep relationships—the essential foundation for empathy and a caring, healthy society. Sounding an important warning bell, *Born for Love* offers practical ideas for combating the negative influences of modern life and fostering positive social change to benefit us all.

In overwhelming trauma, when words fail, it is the body that begins to speak. How can clinicians listen to the body and understand its messages? This book is both a detailed review of the body symptoms and body image distortions found after trauma and a textbook of psychotherapy techniques to repair broken metaphors about the body so that the body-self and its functioning can be restored. Multiple theoretical perspectives—Freudian psychoanalytic theory, attachment theory, trauma theory—are synthesized to shape an interlocking framework within which the therapist can listen and stay with the messages from the patient's body. The reader is guided by detailed clinical examples drawn from an international group of trauma therapists that includes Barry Cohen, Richard Kluft, Bruce Perry, Valerie Sinason and Onno van der Hart.
