Industrial Megaprojects: Concepts, Strategies, and ...
Edward W. Merrow is the founder and CEO of Independent Project Analysis, Inc., the world's leading consulting firm evaluating billion-dollar megaprojects of national and international oil, chemical, pharmaceutical, and major mineral companies, and benchmarking their cost, schedules, safety, startup, and operational performance. Before founding IPA in 1987, Merrow was a research analyst and later the director of the Energy Policy Program at the RAND Corporation.

Yet, management at the companies know full well the complexity and the difficulty faced when mounting megaprojects. Industrial Megaprojects explains the underlying causes of over-budgeted, delayed, and unsafe megaprojects: poor project management, destructive team behaviors, weak accountability systems, an almost pathological focus on the short-term, and the unwillingness to invest in deep technical expertise. Modern life as we know it relies on the success of these projects.

Megaprojects—Large, complex projects in petroleum, minerals, chemicals, and power fail much too often for comfort. Large cost overruns, major delays, poor operability, and far too many safety incidents characterize well over half of the industrial projects of \$1 billion or more around the world. In this book, Ed Merrow, the founder of Independent Project Analysis (IPA), explores the reasons behind the failures and comes to a very useful, if surprising, conclusion: the damage is largely ...
