### ~~Injection Molds And Molding A~~

Injection moulding (U.S.  
spelling: injection

molding) is a  
manufacturing process  
for producing parts by  
injecting molten material  
into a mould, or  
mold. Injection moulding  
can be performed with a  
host of materials mainly  
including metals (for  
which the process is

Injection Molding is a manufacturing process for producing parts in large volume. It is most typically used in mass-production processes where the same part is being created thousands or even millions of times in succession. Why Use Injection Molding: The principal advantage of injection molding is the ability to scale
