Let p_i be the probability of winning
against the opponent played in the i th
turn. Then, you will win the tournament if
you win against the 2nd player (probability
 p_2) and also you win against at least one
of the two other players [probability $p_1 +$
 $(1 - p_1) p_3 = p_1 + p_3 - p_1 p_3$].

Introduction to Probability by John E.

Freund feels like an ordinary text that plays out the same just like the others I read in college. There is an attempt to explain some of the topics offered:

possibilities, probabilities, combinations, permutations, conditional probabilities, Venn diagrams, Bayes' rule, and probability distributions.
