Not just another jeremiad against prevailing isms and orthodoxies, **Why Literature Matters** in the 21st Century examines literature in its connection to virtue and moral excellence. The author is concerned with literature as the teacher of virtue. The current crisis in the humanities, Mark William Roche argues, may be traced back to the separation of art and morality. (" When the distinction between is and ought is leveled, " he writes, " the power of the professions increases. ") The arts and humanities concern themselves with the fate and prospects of humankind. Today that fate and those prospects are under the increasing influence of technology. In a technological age, literature gains in importance precisely to the extent that our sense of intrinsic value is lost. In its elevation of play and inexhaustible meaning, literature offers a counterbalance to reason and efficiency. It helps us grasp the ways in which diverse parts form a comprehensive and complex whole, and it connects us with other ages and cultures. Not least, great literature grapples with the ethical challenges of the day.

Contributes to Foucauldian scholarship by contextualizing Foucault's key concepts and identifying current and emerging applications of his work.

The Work of Reading: Literary Criticism in the 21st Century is a sustained critical examination of the developments in the field of literary studies from the early 2000s onwards within the context of the systematic problems in the humanities. This volume analyzes the origins of the current methodsincluding New Historicism, empiricism, New Formalism, postcritique, and othersand posits alternatives to the present state of literary studies. At a time when many aspects of current methods show a desire to adopt values from other disciplines to solve internal crises, this volume advocates a renewed focus on questions of form by means of the praxis of aesthetic study, close reading, and other modes of engaging directly with literary texts.

Environmental Criticism for the Twenty-First Century showcases the recent explosive expansion of environmental criticism, which is actively transforming three areas of broad interest in contemporary literary and cultural studies: history, scale, and science. With contributors engaging texts from the medieval period through the twenty-first century, the collection brings into focus recent ecocritical concern for the long durations through which environmental imaginations have been shaped. Contributors also address problems of scale, including environmental institutions and imaginations that complicate conventional rubrics such as the national, local, and global. Finally, this collection brings together a set of scholars who are interested in drawing on both the sciences and the humanities in order to find compelling stories for engaging ecological processes such as global climate change, peak oil production, nuclear proliferation, and food scarcity. **Environmental Criticism for the Twenty-First Century** offers powerful proof that cultural criticism is itself ecologically resilient, evolving to meet the imaginative challenges of twenty-first-century environmental crises.
