(Redirected from MIL-STD-6016) Link 16 is a military tactical data link network used by NATO and nations allowed by the MIDS International Program Office (IPO). Its specification is part of the family of Tactical Data Links. With Link 16, military aircraft as well as ships and ground forces may exchange their tactical picture in near-real time.

### Link 16 - Wikipedia

The purpose of MIL-STD-6016 is to describe the approved standards to achieve compatibility and interoperability between command and control and communications systems and equipment of United States (U.S.) and coalition military forces employed or intended to be employed in joint tactical operations.

MIL-STD-6016C (NOTICE 2), DEPARTMENT OF DEFENSE INTEROPERABILITY STANDARD: TACTICAL DATA LINK (TDL) LINK-16 MESSAGE STANDARD (U) (02 NOV 2006)., MIL-STD-6016C is UNCLASSIFIED and contains the tactical data link (TDL) Link-16 message standard. This link was known as TADIL J in the past, or as JTIDS or MIDS by some.

### MIL-STD-6016 C NOTICE-2 INTEROPERABILITY TACTICAL DATA

NATO STANAG 5516/MIL-STD-6016 describes the TADIL J message formats and Link 16 network instructions. There are immediate operational requirements for existing military simulations to exchange TADIL J/Link 16 data using a single interoperable standard. Several protocols have evolved to satisfy specific needs.

MIL-STD-6011 exchanges digital information among airborne, land-based, and shipboard tactical data systems. It is the primary means to exchange data such as radar tracking information beyond line of sight. TADIL-A can be used on either high frequency (HF) or ultrahigh frequency (UHF). However, the U.S. Army uses only HF.
