In the tradition of American Gods, fifteen-year-old twins Eliot and Fiona find out that they are the mortal offspring of Lucifer and the goddess Fate. It takes them around 300 pages to discover this fact (which is far too late in a 600 page book, IMHO), and that is the point the novel finally takes off.

faq – Eric Nylund

"Mortal coil" is a poetic term for the troubles of daily life and the strife and suffering of the world. It is used in the sense of a burden to be carried or abandoned. To "shuffle off this mortal coil" is to die, exemplified in the "To be, or not to be" soliloquy in Shakespeare's Hamlet.

Eric Nylund's new novel is Mortal Coils is a young adult Urban Fantasy novel. His view of the genre is strangely lacking in werewolves and vampires, but that in no way impairs his work. Mortal Coils is a wonderful entry into the market without having to fall back on all things cliché.

their father is Lucifer, Lord of the infernals, a diabolical fallen angel. The families have put them through rigorous, life-threatening challenges, and together they've risen to combat them in amazing ways. But now they are facing the greatest trial of all—high school. Paxington Unviersity is no normal high school—it's a place where gods and goddesses, warriors and socerers learn to harness their power, where a debate in class can end in a duel, and your classmates aren't simply friends or enemies, but allies in battle or threats to your life. To flunk is to die--only the toughest graduate. As Fiona and Eliot struggle to keep up their grades by surviving the rigorous training, both families are watching. High school is bad enough, but imagine being caught in the midst of an immortal/infernal war... At the Publisher's request, this title is

after the end of the world, and goblins had been at the cellar again. . . . Not that anyone would admit it was goblins. In Maddy Smith's world, order rules. Chaos, old gods, fairies, goblins, magic, glamours—all of these were supposedly vanquished centuries ago. But Maddy knows that a small bit of magic has survived. The “ruinmark” she was born with on her palm proves it—and makes the other villagers fearful that she is a witch (though helpful in dealing with the goblins-in-the-cellar problem). But the mysterious traveler One-Eye sees Maddy's mark not as a defect, but as a destiny. And Maddy will need every scrap of forbidden magic One-Eye can teach her if she is to survive that destiny.

How humans have felt and thought about the body-our bodies-

has never been static. Rather, it has shifted across times and cultures, taking and losing definition due to any number of forces and trends-philosophical, religious, cultural, technological. Sometimes we imagine our identity purely as an extension of our fleshly self and its assemblage of functions, organs, and appendages, sometimes as something entirely separate and discrete-trapped as opposed to defined by our "mortal coil," as Hamlet frames it in his famous soliloquy. So, too, over time, our ideas about what constitutes the desirable, the healthy, the beautiful, and the whole have remained partial, each an impression formed by its particular moment in time. In this probing and illuminating new book, Fay Bound Alberti deploys the global histories of medicine, pathology, and sensibilities to examine our changing notions

of the human body. Each chapter focuses on one part—bones, skin, sexual organs, spine, tongue, heart—revealing the cultural meanings tied to each, the repercussions of these associations, and ultimately the harm that comes of distinguishing mind and body, the parts from the whole, as is so often the case in Western medicine. This Mortal Coil explores many enduring themes: the nature of identity, the relationship between the brain and the heart, and the gendering of our physical and emotional selves. Moving beyond the surface and down to what lies beneath, Bound Alberti provides a rich and fascinating account of the human body, shedding light on the role scientific developments—from medical care to plastic surgery to cloning—play in how we look at and shape ourselves. Bound Alberti's provocative and
