Statistical Weather and Climate Information NCEI offers several types of climate information generated from examination of the data in the archives. These types of information include record temperatures, record precipitation and snowfall, climate extremes statistics, and other derived climate products. Regional

Climate Information - National Climatic Data Center

The Comparative Climatic Data tables of meteorological elements outline the climate conditions at major U.S. weather observing stations, Puerto Rico, and the Pacific Islands. Observing sites presently in use as well as former sites with comparable exposure provide these data. The tables of observed data omit stations that have less than three years of data for the current operating site.
