guidelines, refers to reviews provided on manuscript submissions to journals, but can also include reviews for other platforms and apply to public commenting that can occur pre- or post-publication.

Peer Review General and Ethical Guidelines - Wiley

COPE has produced some guidelines which set out the basic principles and standards to which all peer reviewers should adhere during the peer-review process in research publication. The aim has been to make them generic so that they can be applied across disciplines. Peer reviewers play a role in ensuring the integrity of the scholarly record.

Ethical guidelines for peer reviewers (English) | COPE ...

Peer reviewers should declare any conflicts of interest (seeking advice from the publisher if they are unsure), and possess sufficient knowledge in the field to perform a thorough assessment of the manuscript. You can find further information on competing interests here. Peer reviewers must keep any information regarding the identity of the authors and the content of the manuscript confidential. Peer review comments should be objective and constructive without being of a hostile or ...
