longer functioned as an explicit marker of second-class citizenship. The subterranean nature of race manifests itself in discussions of the Trayvon Martin shooting that focus on his hoodie, an object of clothing that anyone can choose to wear, rather than focusing on structural racism; in discussions of the epidemic proportions of incarcerated black and brown people that highlight the individual's poor decision making rather than the criminalization of blackness; in evaluations of black independence struggles in the Caribbean and Africa that allege these movements have accomplished little more than creating a black ruling class that mirrors the politics of its former white counterpart. Black Movements intervenes in these discussions by highlighting the ways in which artists draw from the past to create coherence about blackness in present and future worlds. Through an exploration of the way that black movements create circuits connecting people across space and time, Black Movements offers important interventions into performance, literary, diaspora, and African American studies.

Rituals and performances are a key theme in the study of nations and nationalism. With the aim of stimulating further research in this area, this book explores, debates and evaluates the role of rituals and performances in the emergence, persistence and transformation of nations, nationalisms and national identity. The chapters comprising this book investigate a diverse array of contemporary and historical phenomena relating to the symbolic life of nations, from the Yasukuni Shrine in Japan to the Louvre in France, written by an interdisciplinary cast of world-renowned and up-and-coming scholars. Each of the contributors has been encouraged to think about how his or her particular approach and methods relates to the others. This has given rise to several recurring debates and themes running through the book over how researchers ought to approach rituals and performances and how they might best be studied. The Cultural Politics of Nationalism and Nation-Building will appeal to students and scholars of ethnicity and nationalism, sociology, political science, anthropology, cultural studies, performance studies, art history and architecture.

With its dynamic choreographies and booming drumbeats, taiko has gained worldwide popularity since its emergence in 1950s Japan. Harnessed by Japanese Americans in the late 1960s, taiko's sonic largesse and buoyant energy challenged stereotypical images of Asians in America as either model minorities or sinister foreigners. While the majority of North American taiko players are Asian American, over 400 groups now exist across the US and Canada, and players come from a range of backgrounds. Using ethnographic and historical approaches, combined with in-depth performance description and analysis, this book explores the connections between taiko and Asian American cultural politics. Based on original and archival interviews, as well as the author's extensive experience as a taiko player, this book highlights the Midwest as a site for Asian American cultural production and makes embodied experience central to inquiries about identity, including race, gender, and sexuality. The book builds on insights from the fields of dance studies, ethnomusicology, performance studies, queer and feminist theory, and Asian American studies to argue that taiko players from a variety of identity positions perform Asian America on stage, as well as in rehearsals, festivals, schools, and through interactions with audiences. While many taiko players play simply for the love of its dynamism and physicality, this book demonstrates that politics are built into even the most mundane aspects of rehearsing and performing.

Since its founding in 1964, the United Republic of Tanzania has used music, dance, and other cultural productions as ways of imagining and legitimizing the new nation. Focusing on the politics surrounding Swahili musical performance, Kelly Askew demonstrates the crucial role of popular culture in Tanzania's colonial and postcolonial history. As Askew shows, the genres of ngoma (traditional dance), dansi (urban jazz), and taarab (sung Swahili poetry) have played prominent parts in official articulations of "Tanzanian National Culture" over the years. Drawing on over a decade of research, including extensive experience as a taarab and dansi performer, Askew explores the intimate relations among musical practice, political ideology, and economic change. She reveals the processes and agents involved in the creation of Tanzania's national culture, from government elites to local musicians, poets, wedding participants, and traffic police. Throughout, Askew focuses on performance itself—musical and otherwise—as key to understanding both nation-building and interpersonal power dynamics.

Cultural theory has taken a 'performative turn', shifting its focus from the textual nature of the world to how the social world is narrated, its subjects are subjected and its relations are ritually enacted. The rise of performativity in cultural theory - spearheaded in many ways by feminist theory - has profound implications for the way we think about ethics and politics. Indeed, as it concerns all aspects of 'difference', it reshapes the ways we think about the continuities and interruptions of social life itself. Culture and Performance explores the development and direction of the notion of performativity. It interrogates the idea of subjectivity, the possibility of ethics and, beyond this, it explores new ways of thinking political imaginations and possibilities. It traces the implications of the concept, and assesses the critique that is emerging from a renewed interest in creativity.
