80386 Programmer's Reference  
Manual -- Section 1.1

The 80386 contains a total of sixteen registers that are of interest to the applications programmer. As Figure 2-5 shows, these registers may be grouped into these basic categories:

General registers. These eight 32-bit general-purpose registers are used primarily to contain operands for arithmetic and logical operations.

Segment registers.

Manual -- Section 2.3

The 80386 has instructions for referencing the segment registers (CS, DS, ES, SS, FS, GS). These instructions are used by applications programs only if systems designers have chosen a segmented memory model. The 80386 also has
