Recruitment refers to the overall process of attracting, selecting and appointing suitable candidates for jobs within an organisation, either permanent or temporary. Recruitment can also refer to processes involved in choosing individuals for unpaid positions, such as voluntary roles or training programmes. Recruitment may be undertaken in-house by managers, human resource generalists and/or recruitment specialists. Alternatively, parts of the process may be undertaken by either public-sector employment agencies, commercial recruitment agencies, or specialist search consultancies. The use of internet-based services and computer technologies to support all aspects of recruitment activity and processes has become widespread.

The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

Ever wondered how to build a recruitment strategy to achieve the success and growth your business deserves? Are you sick of relying on recruitment agencies and would love to take back control of your recruitment - but don't know where to start? Do you lack processes and systems and need a reliable method for achieving consistent recruitment success in your business? Here is the only book on recruitment you will ever need. Pulling back the curtain on how to elevate your business by ensuring you have the right people in the right place at the right time, Rosie Skinner, author, blogger, speaker and recruitment expert shares her method for ambitious businesses to revolutionise their recruitment. This book will give you: * A blueprint to high-growth hiring. * A clear step-by-step guide to build the recruitment systems and processes your business needs. * A simple plan to align your talent strategy with your business strategy. * Fresh ideas, concepts and a new way of thinking about how getting recruitment right can transform your success in business. This book is perfect for entrepreneurs and senior leaders within high-growth businesses who are serious about taking their business to the next level. ABOUT THE AUTHOR Rosie Skinner is a recruitment expert, speaker and the Founder and Director of Mployable - Talent Strategy and Recruitment on Subscription, also known as the Outsourced InHouse Recruitment Team. She's been in the recruitment industry for almost ten years, in recruitment agency roles in her early days, through to in-house recruitment and HR managerial roles in the latter part of her career. Rosie is CIPD and REC qualified and has spoken at prestigious industry events such as 'Disrupt HR' and 'Inspire Recruitment' as well as numerous business events and workshops. Rosie loves recruitment but resents the reputation the industry has. She believes that 'Done right, and done fairly for both parties, a recruitment professional has the capability to transform a business. It doesn't have to be expensive or shrouded in questionable T&Cs. Recruitment at its heart is built around people and relationships - so it needs to be focused on service and an experience - not a transaction.' Rosie's creation of Mployable is a response to that need for change in the outsourced recruitment industry. It's time for an ashake-up, and she's leading the charge. www.mployable.co.uk

This text examines the domestic and global consequences of Chinese state capitalism, focusing on the impact of state-owned enterprises on regulation and policy, while placing China's variety of state capitalism in comparative perspective.

Cynics suggest that American manufacturing has reached the end of its road and is the price we pay for "globalization." Alan Uke sees it differently. In *Buying America Back* he outlines solutions to put control back in the hands of American consumers by helping them to make wise buying choices that help our economy and help to create jobs. Mr. Uke was the architect of the successful federal Automobile Smog Index. He is now proposing a bill before Congress to create a new country of origin label for manufactured goods. This informative but simple tag would help reinvigorate American industry by educating consumers to use one of the most effective tools they have—the power of the pocketbook. Surprising and enlightening, *Buying America Back* encourages us to take action to do our part as responsible consumers and conscientious citizens. American prosperity is not a thing of the past, and this book shows us the way back.
