Why Microgreen Seed Density is Important - Home Microgreens

Some General Guidelines:

Microgreens in general prefer a soil pH of near 6.0 at germination in their water, soil or hydroponic solution.

Most municipal water systems are too

Access Free Sources For Microgreens Seeds Needs

high (too acidic) in pH for optimum swelling and shoot strength. See [pH balancing your water](#) [pH guideline](#) for more.

Plants have diverse needs.

Access Free Sources For Microgreens Seeds Needs

Microgreens like sunflower prefer a lot of light, I give them 20 - 24 hours of light daily, and they're delicious and fast growing. Some microgreens prefer less light. These will do well with natural light in the winter, or with shorter lighting cycles if using artificial light. Amaranth; Brassicas: arugula,
