The result of this explosion of research is a new science of the unconscious, and a sea change in our understanding of how the mind affects the way we live. These cutting-edge discoveries have revealed that the way we experience life-our perception, behavior, memory, and social judgment-is largely driven by the mind's subliminal processes and not by the conscious ones, as we have long believed.

**Subliminal: the new unconscious - All In The Mind - ABC ...**

As adjectives the difference between subconscious and subliminal is that subconscious is partially conscious while subliminals (of a stimulus) below the threshold of conscious perception, especially if still able to produce a response. As a noun subconscious is that part of the mind that is not consciously perceived; one's innermost thoughts.

**What is the difference between subconscious and subliminal ...**

The so-called new unconscious is aggressively antipsychanalytic.1 A very brief defini- tion catches the most important elements: "The cognitive unconscious includes all the mental processes that are not experienced by a person but that give rise to a person's thoughts, choices, emotions, and behavior."2 The key here—and the key to my chap- ter—is these mental processes are "not experienced" by us—and because they are not, they cannot be seen directly.
