In this activity, you are given the network address of 192.168.100.0/24 to subnet and provide the IP addressing for the network shown in the topology. Each LAN in the network requires enough space for, at least, 25 addresses for end devices, the switch and the router. The connection between R1 to R2 will require an IP address for each end of the link. Part 1: Design an IP Addressing Scheme Step 1: Subnet the 192.168.100.0/24 network into

of segmenting a network, by dividing it into multiple smaller network spaces, is called subnetting. These subnetworks are called subnets. Although subnetting calculators are plentiful and freely accessible on the Internet, you must know how to subnet without using a calculator when you sit for the CCENT exam.
