Recent events in Ukraine and Russia and the subsequent incorporation of Crimea into the Russian state, with the support of some circles of inhabitants of the peninsula, have shown that the desire of people to belong to the Western part of Europe should not automatically be assumed. Discussing different perceptions of the Ukrainian-Russian war in neighbouring countries, this book offers an analysis of the conflicts and issues connected with the shifting of the border regions of Russia and Ukraine to show how 'material' and 'psychological' borders are never completely stable ideas. The contributors – historians, sociologists, anthropologists and political scientists from across Europe – use an interdisciplinary and comparative approach to explore the different national and transnational perceptions of a possible future role for Russia.

This book assesses the competitive and contentious EU – Russia relationship in relation to Ukraine from 2010 to 2013, focusing on the important areas of trade, energy and security. The key issue explored is whether this relationship played any meaningful role in the deterioration of the situation in Ukraine since late 2013.

The Russia-Europe relationship is deteriorating, signaling the darkest era yet in security on the continent since the end of the Cold War. In addition, the growing influence of the Trump administration has destabilized the transatlantic security community, compelling Europe—especially the European Union—to rethink its relations with Russia. The volume editors' primary goal is to illuminate the nature of the deteriorating security relationship between Europe and Russia,

and the key implications for its future. While the book is timely, the editors and contributors also draw out long-term lessons from this era of diplomatic degeneration to show how increasing cooperation between two regions can devolve into rapidly escalating conflict. While it is possible that the relationship between Russia and Europe can ultimately be restored, it is also necessary to understand why it was undermined in the first place. The fact that these transformations occur under the backdrop of an uncertain transatlantic relationship makes this investigation all the more pressing. Each chapter in this volume addresses three dimensions of the problem: first, how and why the power status quo that had existed since the end of the Cold War has changed in recent years, as evidenced by Russia ' s newly aggressive posturing; second, the extent to which the EU ' s power has been enabled or constrained in light of Russia ' s actions; and third, the risks

entailed in Europe ' s reactive power—that is, the tendency to act after-the-fact instead of proactively toward Russia—in light of the transatlantic divide under Trump.

The unfolding crisis in Ukraine has brought the world to the brink of a new Cold War. As Russia and Ukraine tussle for Crimea and the eastern regions, relations between Putin and the West have reached an all-time low. How did we get here? Richard Sakwa here unpicks the context of conflicted Ukrainian identity and of Russo-Ukrainian relations and traces the path to the recent disturbances through the events which have forced Ukraine, a country internally divided between East and West, to choose between closer union with Europe or its historic ties with Russia. In providing the first full account of the ongoing crisis, Sakwa analyses the origins and significance of the
