Meet the father of science fiction, Jule Verne. Born in France in 1829, Jules Verne always dreamed of adventure. At age 11, he snuck onboard a ship headed for the Indies only to be discovered by his father and have his dreams dashed. After his father made him swear to only travel "in his imagination," Verne kept his promise for the rest of his life. He began writing adventure stories as a young man and became a popular writer throughout France. Known for mixing scientific discovery and literature in his books like Twenty Thousand Leagues Under the Sea and Around the World in 80 Days, Verne is often called "The Father of Science Fiction."

A hundred years after the death of Jules Verne, the founding father of science fiction, The Mammoth Book of New Jules Verne Adventures celebrates his amazing vision. A host of top science fiction authors pay homage to Verne's genius with a series of breathtaking stories using as a springboard his iconic ideas and characters. Collected in this anthology of Extraordinary Voyages are stories of intrigue and adventure set in the four corners of the globe, and even within it. Stories set in the past, present and future - tales that will delight with the same sense of wonder conjured by Jules Verne in such novels as Around the World in Eighty Days, Journey to the Center of the Earth and Twenty Thousand Leagues Under the Sea...

A book from the pen of Jules Verne is its own best advertisement. Mistress Branican shows no falling off in the author's imaginative faculties or vivacity. This is the first of bis books in which a woman has been made the central figure. Perhaps the flying trips around the world made by Miss Bisland and " Nelly Bly" gave him the idea. At any rate, it is a good one. Mistress Branican, however, traveled with a caravan, and not with a small hand-bag. The adventures of this lady on her travels are thrilling and humorous at the same time, and the whole is told with that air of sincerity which is peculiar to the romances of Jules Verne.

Works Of Jules Verne, has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

This superb collection of classic science fiction features the best of Jules Verne's epic adventure stories, including Five Weeks in a Balloon (1863), A Journey to the Center of the Earth (1864), From the Earth to the Moon (1865), Twenty Thousand Leagues Under the Sea (1870), and Around the World in Eighty Days (1873). Often called the lfather of science fiction," Verne was a masterful storyteller and visionary, anticipating such technological marvels as the submarine and skyscraper. For nearly 150 years, his unusual characters, outlandish plots, and vivid descriptions have captivated readers, and now they are available--complete and unabridged--in this gorgeous slipcase edition. The stylish edition also features a historical timeline and comprehensive introduction, enlightening the reader on the author's life and works. The Knickerbocker Classics bring together the works of classic authors from around the world in stunning gift editions to be collected and enjoyed. Complete and unabridged, these elegantly designed cloth-bound hardcovers feature a slipcase and ribbon marker, as well as a comprehensive introduction providing the reader with enlightening information on the author's life and works.

Jules Verne, celebrated French author of Twenty Thousand Leagues Under the Sea and Around the World in 80 Days, wrote over 60 novels collected in the popular series "Voyages Extraordinaires." A handful of these have never been translated into English, including Invasion of the Sea, written in 1904 when large-scale canal digging was very much a part of the political, economic, and military strategy of the world's imperial powers. Instead of linking two seas, as existing canals (the Suez and the Panama) did, Verne proposed a canal that would create a sea in the heart of the Sahara Desert. The story raises a host of concerns -- environmental, cultural, and political. The proposed sea threatens the nomadic way of life of those Islamic tribes living on the site, and they declare war. The ensuing struggle is finally resolved only by a cataclysmic natural event. This Wesleyan edition features notes, appendices and an introduction by Verne scholar Arthur B. Evans, as well as reproductions of the illustrations from the original French edition.

The extraordinary and wonderful adventures which befell Phileas Fogg and his servant Passepartout when they set out to win a bet by going round the world in eighty days.

The Jules Verne Collection includes five novels: Around the World in 80 Days, 20,000 Leagues Under the Sea, Journey to the Center of the Earth, From the Earth to the Moon, and Around the Moon. In Around the World in 80 Days, Jules Verne helped make the world seem a little smaller, and accessible to young adventurers, spurring many to attempt a voyage around the world. In 20,000 Leagues Under the Sea, the description of Nemo's ship, called the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. In Journey to the Center of the Earth, readers were brought face to face with prehistoric creatures deep within the bowels of the Earth. In From the Earth to the Moon, many of Verne's calculations in launching a projectile into space were surprisingly accurate, and his placement of a launch site in Florida predated the Kennedy Space Center's construction in Florida by almost 100 years. In Around the Moon, Verne describes how the gravitational force of a large asteroid can change the course of a space ship, and encouraged readers to dream about the wonders of the Moon's surface.
